IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Este informe contiene información muy importante sobre su agua potable.
Tradúzcalo o hable con alguien que lo entienda bien.

St. Nicholas Ranch and Retreat Has Levels of Uranium Above Drinking Water Standards

Water produced by Well 4 of our water system failed a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what you should do, what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Water sample results collected on 10/09/2015 showed uranium levels of 56 pCi/L. This is above the standard or maximum contaminant level (MCL) of 20 pCi/L.

What should I do?

- **You do not need to use an alternative (e.g. , bottled) water supply.** However, if you have specific health concerns, consult your doctor.
- *This is not an emergency. If it had been, you would have been notified immediately. However, some people who drink water containing uranium in excess of the MCL over many years may have kidney problems or an increased risk of getting cancer.*
- If you have other health issues concerning the consumption of this water, you may wish to consult your doctor.

What happened? What was done?

The water system is undergoing exploratory solutions to correct the issue. We are doing our best to correct the issue in a timely manner.
For more information, please contact Tyler Thomas, Water System Operator at (559) 246-7513
