

Letter No.: EEO 2016-0803

July 5, 2016

VIA E-FILE

Mr. Salvador Turrubiartes  
Associate Sanitary Engineer  
State Water Resources Control Board  
Division of Drinking Water-Sacramento District  
1001 I Street, 13th Floor  
Sacramento, CA 95814

Subject: 2015 Consumer Confidence Report and Certification Form

Dear Mr. Turrubiartes:

Please find enclosed copies of El Dorado Irrigation District's 2015 Water Quality Report (WQR) also known as a Consumer Confidence Report (CCR) along with the required certification forms for the following water systems:

<u>PWS Code</u>	<u>System Name</u>
0910001	Main Water System
0910017	Strawberry Water System
0910018	Outingdale Water System

If you need further information or have any questions, please contact me at (530) 642-4060.

Sincerely,

Dana Strahan  
Drinking Water Division Manager

DS/NG:at

Enclosures: 2015 WQR and Certification Form– Main Water System  
2015 WQR and Certification Form – Outingdale Water System  
2015 WQR and Certification Form – Strawberry Water System  
The Waterfront: May-June 2016 edition  
Add Proof for the Mountain Democrat: EID 2015 Water Quality Reports Available  
– Run date May 6, 2016

cc with enclosures:

Nicole Graham, Environmental Compliance Analyst

**Consumer Confidence Report  
Certification Form**  
*(To be submitted with a copy of the CCR)*

Water System Name: Main Water System

Water System Number: 0910001

The water system named above hereby certifies that its Consumer Confidence Report was distributed on by June 29, 2016 (date) to customers (and appropriate notices of availability have been given). Further, the system certifies that the information contained in the report is correct and consistent with the compliance monitoring data previously submitted to the State Water Resources Control Board, Division of Drinking Water (DDW).

Certified by: Name: Dana Strahan  
Signature:   
Title: Operations Manager, Drinking Water Division  
Phone Number: (530) 642-4060 Date: 6/30/2016

*To summarize report delivery used and good-faith efforts taken, please complete this page by checking all items that apply and fill-in where appropriate:*

- CCR was distributed by mail or other direct delivery methods (attach description of other direct delivery methods used).
- CCR was distributed using electronic delivery methods described in the Guidance for Electronic Delivery of the Consumer Confidence Report (water systems utilizing electronic delivery methods must complete the second page).
- "Good faith" efforts were used to reach non-bill paying consumers. Those efforts included the following methods:
  - Posting the CCR at the following URL: www.eid.org/main
  - Mailing the CCR to postal patrons within the service area (attach zip codes used)
  - Advertising the availability of the CCR in news media (attach copy of press release)
  - Publication of the CCR in a local newspaper of general circulation (attach a copy of the published notice, including name of newspaper and date published)
  - Posted the CCR in public places (attach a list of locations)
  - Delivery of multiple copies of CCR to single-billed addresses serving several persons, such as apartments, businesses, and schools
  - Delivery to community organizations (attach a list of organizations)
  - Publication of the CCR in the electronic city newsletter or electronic community newsletter or listserv (attach a copy of the article or notice)
  - Electronic announcement of CCR availability via social media outlets (attach list of social media outlets utilized)
  - Other (attach a list of other methods used)
- For systems serving at least 100,000 persons:* Posted CCR on a publicly-accessible internet site at the following URL: www.eid.org/main
- For privately-owned utilities:* Delivered the CCR to the California Public Utilities Commission

## Consumer Confidence Report Electronic Delivery Certification

*Water systems utilizing electronic distribution methods for CCR delivery must complete this page by checking all items that apply and fill-in where appropriate.*

- Water system mailed a notification that the CCR is available and provides a direct URL to the CCR on a publicly available website where it can be viewed (attach a copy of the mailed CCR notification). URL: [www.eid.org/main](http://www.eid.org/main)
- Water system emailed a notification that the CCR is available and provides a direct URL to the CCR on a publicly available site on the Internet where it can be viewed (attach a copy of the emailed CCR notification). URL: [www.\\_\\_\\_\\_\\_](http://www._____)
- Water system emailed the CCR as an electronic file email attachment.
- Water system emailed the CCR text and tables inserted or embedded into the body of an email, not as an attachment (attach a copy of the emailed CCR).
- Requires prior CDPH review and approval.* Water system utilized other electronic delivery method that meets the direct delivery requirement.

*Provide a brief description of the water system's electronic delivery procedures and include how the water system ensures delivery to customers unable to receive electronic delivery.*

(1) Published an article in its bi-monthly May-June 2016 newsletter (The Waterfront) mailed to each Account Holder of Record notifying them the annual Water Quality Report is available online for review and hard copies provided upon request. It also stated the annual WQR continues to be available for review on EID's website. URLs were provided in the article for easy access to each of the three reports.  
(2) Provided the following statement in each bill insert for the May and June billing cycle "Your 2015 Water Quality Report is now available online. To learn more about your drinking water, visit the following URL: [www.eid.org/main](http://www.eid.org/main). Call customer service at 530-642-4000 to request a printed copy".

This form is provided as a convenience and may be used to meet the certification requirement of section 64483(c), California Code of Regulations.

## Drought Update—EID in Good Shape

Since water conservation became mandatory by order of the State Water Resources Control Board in June 2015, EID customers have cumulatively reduced water use by 30 percent compared to 2013. This result exceeded our 28 percent target, and continues to exceed our new 24 percent reduction target.

EID pressed for and received a climate credit that reduced our conservation mandate in early April 2016. As this newsletter is going to press, EID is still required to reduce its water consumption by 24 percent through October 2016.

On April 20, the State Water Board is soliciting input on whether to relax or rescind the order Governor Brown issued in the spring of 2015. At that meeting, EID is requesting elimination of the drought declaration to return authority to

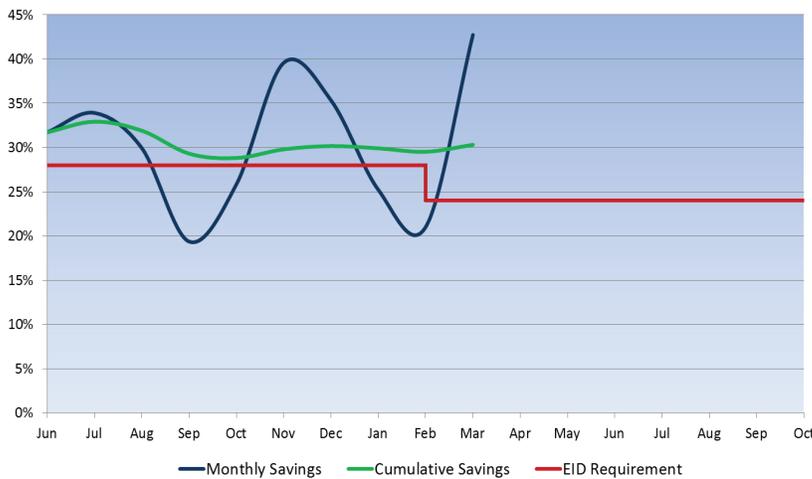

EID to manage its water supply portfolio. The State Water Board will announce its proposed revisions to the policy in early May.

At this time, the district continues to be under a Stage 2 Water Warning and watering restrictions are in place. From April 16 through May 31, customers can water twice weekly with the schedule that is based on their address ending number.

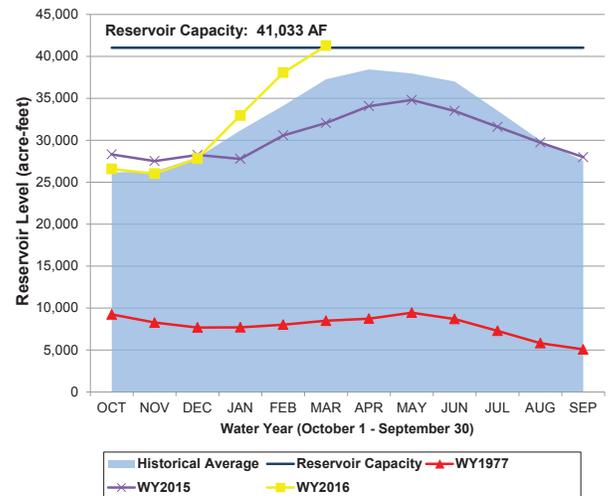

For the most current updates, please keep an eye on the EID drought page at [www.eid.org/drought](http://www.eid.org/drought). To read more about how EID is pressing for more regional control to manage the drought, turn to page two and read the Message from the General Manager entitled "Restore Local Control for Drought Management".

Potable Water Conservation - 2015/2016 vs. 2013  
(June 1, 2015 - March 31, 2016)

**Jenkinson Lake at Sly Park**  
Reservoir Conditions  
(as of April 18, 2016)

The graphs above show (at left) EID's compliance tracking numbers that are transmitted to the state each month. On the right is the current (as of April 18) status of Jenkinson Lake, EID's primary drinking water reservoir.

### Your Water Quality Report is Now Available Online

Each year, EID provides its customers with an annual water quality report to let you know how our water quality stacks up against established federal and state drinking water standards. We encourage you to review this report as it provides details about the source and quality of the drinking water delivered to your community in 2015.

EID maintains three water systems—two small systems that supply the unincorporated communities of Strawberry (approximately 40 miles east of Placerville on Highway 50) and Outingdale (approximately 15 miles southeast of Placerville), and the main system, which covers the rest of EID's service area.

Scan the QR codes to the right with your smartphone or tablet to read the 2015 water quality report for your community. Or go to the following addresses.

MAIN SYSTEM: [www.eid.org/main](http://www.eid.org/main)

OUTINGDALE: [www.eid.org/outingdale](http://www.eid.org/outingdale)

STRAWBERRY: [www.eid.org/strawberry](http://www.eid.org/strawberry)

## Message from the General Manager

### Restore Local Control for Drought Management

Jim Abercrombie

scinded its drought declaration entirely were it not for the state's mandate to continue to implement the district's drought contingency plan.

For now, we are maintaining the Stage 2 Water Warning, which includes the 24 percent conservation mandate and restrictions on certain uses of potable water. We are doing this solely because the state requires that we do it. But the state mandates do not adequately take into account regional differences in supply.

For EID and other water purveyors in our region, the drought is over.

The district has returned to normal water supply conditions. Our largest reservoir at Jenkinson Lake, which holds a two-year supply, is full and spilling. Folsom Lake is making flood-control releases and will likely fill this year. Every reservoir upon which the district relies is full or will fill, and EID anticipates again having surplus water available for transfer in 2016.

Due to our customers' superb performance when called to conserve, the district has exceeded the 24 (previously 28) percent conservation mandated by the State Water Resources Control Board since June 2015.

Throughout the drought, beginning with the first dry year in 2012, the district has been able to serve its customers without risk of shortage. And in 2015—in the depths of the drought—EID was able to transfer surplus water (water that would otherwise have been lost to downstream users) to an agricultural water purveyor in central California, enhancing the non-rate revenues that we use to help pay down debt and fund needed infrastructure reinvestments.

In addition to customer conservation, EID has developed a reliable water supply in part due to the district's investment of many millions of dollars to build infrastructure and prudently manage its robust water portfolio.

Our greatest drought-management challenge at this point is explaining to our customers why they must still conserve when there is no reason to believe that we will be short of water to serve them. The short answer is, we remain legally bound to follow the state's mandates, whether or not they make sense in our region.

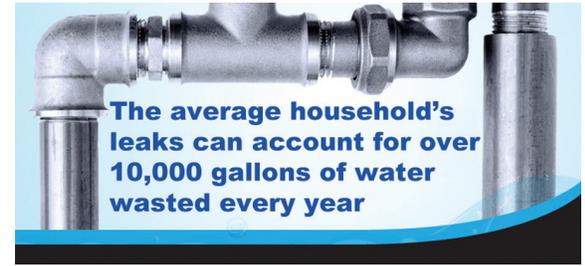

We recognize that some parts of the state remain water-short, but we're pushing hard to make the state regulators aware of our situation. District staff is urgently requesting that the State Water Board modify its regulation to take a more regional approach. Our position is that where drought conditions have eased—as is the case in EID's service area—the drought regulation should be lifted and control restored to local agencies who know best how to manage their resources.

If the state listens and responds positively, we will move to lift all local drought restrictions.

During its March 28 meeting EID's Board of Directors voted to rescind the drought emergency that has been in continuous effect since February 4, 2014.

In fact, the board would have unanimously re-

## The Facts on Leaks

It is estimated that ten percent of homes have leaks that waste 90 gallons or more per day.

The average household's leaks can account for more than 10,000 gallons of water wasted every year, or the amount of water needed to wash 270 loads of laundry.

Nationwide, household leaks can waste more than 1 trillion gallons annually. That's equal to the annual household water use of more than 11 million homes.

Common types of leaks found in the home include worn toilet flappers, dripping faucets, and other leaking valves. All are easily correctable.

Keep your home leak-free by repairing dripping faucets, toilet flappers, and showerheads. In most cases, fixture replacement parts don't require a major investment.

Most common leaks can be eliminated after retrofitting a household with new WaterSense labeled fixtures and other high-efficiency appliances.

Don't forget to check irrigation systems for leaks and make sure no water is running off when irrigating.

### Leak Detection

A good method to check for leaks is to examine your winter water usage. It's likely that a family of four has a serious leak problem if its winter water use exceeds 1,600 cubic feet (12,000 gallons) per month.

Check your water meter before and after a two-hour period when no water is being used. If the meter does not read exactly the same, you probably have a leak.

One way to find out if you have a toilet leak is to place a drop of food coloring in the toilet tank. If the color shows up in the bowl within 10 minutes without flushing, you have a leak. Make sure to flush immediately after this experiment to avoid staining the tank.

To learn more about how to find and fix leaks, visit the Maintenance page of our website at [www.eid.org/leaks](http://www.eid.org/leaks).

## EID RECREATION OPPORTUNITIES: PERENNIAL COMMUNITY FAVORITES

Top: The boardwalk at Hazel Meadow. Below, left: View from a camp site within the Pinecone campground area. Below, right: Stand-up paddleboarders enjoy Jenkinson Lake at dusk

Every year, EID's recreation sites rank among the most popular destinations for campers, hikers, boaters, anglers, equestrians, photographers, and all-around nature lovers. Sly Park Recreation Area, located in Pollock Pines, serves more than 400,000 visitors annually. In 2015—for the ninth consecutive year—Sly Park was voted “Best Recreation Facility” by readers of the *Mountain Democrat* newspaper, as well as “Best Campground” on the KCRA 3 A-List.

### Recreation Opportunities Abound

Whether you come to camp, or just spend the day hiking and enjoying the scenery, the amenities around Sly Park's Jenkinson Lake are hard to beat. Day-use picnic areas are located throughout the park area. One large day-use area is located a half mile from the gatehouse entrance, and all are available on a first-come, first-served basis.

Camping opportunities are plentiful. Sly Park features six group camps, equestrian campsites, an event center, a scout camp, and eight family campgrounds that contain a total of 191 individual sites, each with a picnic table, fire ring, and barbecue.

There is access to 30 miles of hiking, mountain bike, and equestrian trails around the lake and in the surrounding Eldorado National Forest land. Trailhead parking is located throughout the park. Visitors wishing to hike to the waterfall should use the Hazel Creek Meadow day use area, which is located four miles past the gatehouse entrance. Additional trailhead parking is located just past the second dam on Mormon Emigrant Trail at Bumpy Meadows.

Sly Park offers an excellent facility for larger groups, like wedding receptions and birthday parties. The scenic outdoor

wooded setting at the Event Center includes lake views. Outside the facility there is plenty of room for up to 75 guests. There's a barbecue area as well as picnic tables and a large deck overlooking the lake. Inside, the house can hold up to 46 people. There is one large room and a smaller room, as well as a full kitchen with a stove, refrigerator, and microwave.

Getting on the water is a breeze and there are many opportunities to rent kayaks, paddleboats, stand-up paddleboards and canoes on weekends at the Stonebraker boat launch between Memorial Day weekend and Labor Day.

“EID takes pride in hosting the many thousands of families and friends who visit our recreation sites,” said EID Parks and Recreation Manager Greg Hawkins. “Not only do these facilities serve a vital role in our water and hydroelectric systems, but they are also the places where generations of our visitors return again and again to make lasting memories.”

Not only does it have beautiful facilities for recreation, Jenkinson Lake at the heart of Sly Park Recreation Area represents a vital component in EID's drinking water system.

“Recreation is directly related to our core business of water,” said Hawkins. “All of our recreation facilities are located at or near EID drinking water sources and we recognize the need to manage recreational uses in a manner that preserves the

high quality of water. Recreation's continuing mission is to provide financially and environmentally sustainable recreation opportunities for our visitors while protecting water quality and the district's resources.”

When EID purchased Jenkinson Lake from the U.S. Bureau

of Reclamation, oversight of the lake changed from federal to state authority. The State of California does not allow body contact in drinking water reservoirs. Jenkinson Lake is one of approximately six drinking water reservoirs with an exemption from the “no body contact” regulation.

When the legislation was passed in 2006 allowing body contact to continue at the lake, certain legislative conditions were imposed. The conditions were: 1) to provide fencing and buoys at the second dam to protect the drinking water intake, 2) not allowing domestic animals in the water, and 3) not allowing diapers of any sort in the water. Violations of these conditions could result in the revocation of the “no body contact” exemption.

“No body contact is defined as not allowing wading, swimming, or boating of any kind for people or dogs,” said Hawkins. “Obviously, it would be devastating if we lost the exemption, so it is very important for park staff to enforce the rules.”

**Additional Lakes and Recreational Sites**

EID is mandated by the Project 184 hydroelectric license to operate Silver Lake West Campground, Silver Lake boat launch and day use facilities, Caples Lake boat launch facilities, and Forebay Reservoir.

Silver Lake is situated at an elevation of 7,200 feet and provides an excellent destination for high alpine recreation activities. Surrounded by the Eldorado National Forest, this exceptional location was a resting place along the Mormon Emigrant Trail established by Kit Carson. The summer recreation season at Silver Lake varies depending on snowpack and weather conditions. The goal is to open the facilities for Memorial Day weekend and remain open through October. Silver Lake boat launch includes a day-use area and there are 42 campsites in the Silver Lake West campground.

Caples Lake, at an elevation of 7,800 feet offers another excellent high alpine get-away. The area offers scenic picnicking areas, a boat ramp and access to trails entering the Mokelumne Wilderness to the south. The Caples Lake boat launch facility, which opened in 2010, also has day-use facilities and is open—weather permitting—Memorial Day weekend through October.

*Camping and recreation for the whole family!*  
**4771 Sly Park Road, Pollock Pines, California**  
**(530) 295-6810 • [www.eid.org/recreation](http://www.eid.org/recreation)**  
 Owned and operated by El Dorado Irrigation District

There is also a day-use facility at Forebay Reservoir in Pollock Pines. Forebay includes a delightful picnic area with fishing access. Forebay Reservoir—a no-body-contact reservoir—was created to regulate water flow to EID’s hydroelectric power generation facility. But it is also a great daytime recreation spot, perfect for barbeques, quiet walks, and fishing. The area is located on Forebay Road in Pollock Pines, just off Pony Express Trail at Highway 50’s Sly Park Road exit. The area is open from dawn to dusk.

Recreation’s operational costs are funded from the fees paid by park visitors. Annual passes may be

purchased online, by mail, or in person at the park entrance gatehouse. Annual passes are good for day use access to all three of EID’s recreational use lakes, which include facilities at Silver and Caples lakes in addition to Jenkinson at Sly Park.

*For more information about Sly Park and EID’s other recreational facilities, please visit our website at [www.eid.org/recreation](http://www.eid.org/recreation).*

**2016 REGULAR BOARD MEETINGS**

January	February	March	April	May	June	July	August	September	October	November	December
